

Lighted Hospital Grade Plug

"Let there be light!"

**A unique feature that will
brighten your day !**

Quail Electronics, Inc. is now providing the specialists of the medical field with an additional option. Many applications are used in a dimly lit environment, and sometimes knowing if the connection is on is capital information.

New MOLD with LED

Using the standard configuration of the NEMA 5-15P Hospital Grade Green Dot Plug, we created a new mold of the plug incorporating a LED inside.

Plug LIGHTS UP

When the cord is plugged into a source of power, the Nema 5-15P Hospital Grade Green Dot plug will light up. This new feature will provide a unique tool for companies conscious about the connection of their devices.

Cord Configuration

The 0310.120LT is a 10' power cord using a 18/3 AWG cable with a Grey SJT jacket. The equipment end is the IEC-60320-C13 Clear.

FAQ:

1. How much extra cost is involved with the added LED?
The cost of the 0310.120LT is only 3% more than the same Hospital Grade Power Cord without the LED.
2. Does the power cord with the LED still have the same safety agency approvals?
The 0310.120LT has the same UL and C-UL approvals as the unlighted Hospital Grade Power Cord without the LED.
3. Is the power cord's electrical rating affected by the LED?
No, the 0310.120LT still carries a 10 Amp 125Volt (10A/125V) rating.
